## Remarks

The scribe uses both type of division signs (❖ and ::) randomly.

The piece is attributed to Kemânî Hızır Ağa (d. after 1794) in TR-Iüne 203. In TR-Iütæ 108, the heading states that it might also be attributed to Kantemiroğlu (1673–1723).

There are many interventions of a later hand in the first 17 divisions of H4 (divs. 43–59). Since this points to another variant, it was also necessary to transcribe this second version which is very similar to one in TR-Iüne 211-9 (see below for the melodic line of the alternative H4). But regarding the original layer, all H4s in the consulted concordances are different versions of each other.

It is assumed that the Arabic mîm letter at the end of divs. 4, 12, 19, 28, 38 42, 67 and 74 indicates a repetition.

It is not clear where the performance instruction (mülâzime teslîm) at the end (follwing H4) refers to, since there is no marking indicating any teslîm or mülâzime in the piece. In TR-Iütæ 108, there is an instruction that states H2 should be performed again follwing H4. In TR-Iboa 374, there are two markings (teslîm and mülâzime signs) denoting H2 to be performed following H4. Accordingly, H2 starts as mülâzime and then leads to teslîm. In this regard,

H2 should be performed once again following H4, based on the performance instruction in TR-Iboa 374 and TR-Iütae 108.

- 4.4 The rest sign (,) at the end is ignored in the transcription since it was probably added by later hand. The same approach is applied for many other divs: 7.4, 8.4, 19.4, 28.4, 38.4, 42.4. Also, in TR-Iütae 107 and TR-Iboa 374 there are no rest signs used for these divisions in most of the cases.
- 5 The division sign is not legible as it is scribbled with many small dots made with nib of the pen.
